Hi,

I've added Turkish translation (TR) strings to the base .t files of U++ (core, corectrl, ctrllib, oracle, web, richedit and gridctrl) of U++ (dev 710).

If it is ok for you(I don't know the exact procedure on how to contribute a translation file), I am willing to maintain it too.

PS: the translation has nothing problematic, but to prevent any misunderstanding, I have to state that it needs little improvement on 3 or 4 strings.

Regards.
