First, you done great job with Ultimate, congratulations!

I think it should be casting to (Point) in next line of
/geom/Draw/plotter.cpp

```
Quote: ImageMarker::ImageMarker(const AlphaArray& srcimg, ...)
{
    hotspot = (ignore_hotspot ? (Point) srcimg.GetSize() >> 1 : srcimg.GetHotSpot());
```

Otherwise it wouldn't compile.

But then I have linking errors:

```
Quote:20 undefined symbol(s):
_glbBegin@4 (referenced from c:\devel\ultimate\out\opengl\mingw.blitz.gui.main\$.blitz.o:4 4;
CameraCtrl::GLPaint(v
oid); CameraCtrl::GLPaint(); .text$_ZN10CameraCtrl7GLPaintEv)....
```

I compile and link with MingW.
Any suggestions what's going wrong?

Thanks!
