What happens if this:

```
#include <iostream>
```

```
#include <string>
```

```
using namespace std;
```

```
int main( )
```

```
{
```

```
    string s;
```

```
    cout << "Hello World!" << endl;
```

```
    cin >> s;
```

```
    return 0;
```

```
}
```
