Hi,

actually I use rev. 1472 from svn on debian. A few revisions ago I notice a nice feature in the editor

mark a few lines, press "CTRL + '+'" and the block was marked as comment with /* ... */, press the shortcut again the comments were removed.

actually its not available and I cannot find such a option in the dialog to configure the keyboard shortcuts for the ide.

I really enjoyed it. Is it still available, but with another shortcut? Or did you remove it ...

regards

reinhard
