To speed up translation maybe use <http://translate.google.com/#> and check translation and correct?

sergeynikitin wrote on Thu, 28 January 2010 05:06I have tried to provide such a way that not only the Russian translation could be placed on the site.

The work of translation is not fast. We work together with Anton (sc0rch). We will translate all the articles gradually.

I hope the representatives of other languages is also willing to do the translation.

I do not know how to other countries, but Russia's situation is that the lack of translation is a serious barrier to start using the tool.
