spotted an error in the code!

begnur wrote on Tue, 10 May 2011 17:48how to pass WString from EditString to Sql and from Sql To EditString

for example (below exmaples are only for demonstration I need how to do this. and again characters are non ascii

EditString editstr

String s = editstr->GetString()

Sql sql

sql * Select(p).From(databse).Where(q = s)

// clearing s string

s.Clear();

while(sql.Fetch())

 s.Append(sql[p]);

editstr->SetString(s);

In line

sql * Select(p).From(databse).Where(q = s)

Must be

sql * Select(p).From(databse).Where(q == s)
