Hi Monty!

I'm not sure if I understand correctly... Do you mean something like this? #include
<CtrlLib/CtrlLib.h>

using namespace Upp;

```
class App:public TopWindow {
    typedef App CLASSNAME;
    TabCtrl tabs;
    Button b1,b2,b3;
    Label c1,c2,c3;
public:
    App(){
        c1.SetLabel("Content of tab 1 ...");
        c2.SetLabel("Content of tab 2 ...");
        c3.SetLabel("Content of tab 3 ...");

        Add(tabs.VSizePos(30).HSizePos());
        tabs.Add(c1.SizePos(),"Tab 1");
        tabs.Add(c2.SizePos(),"Tab 2");
        tabs.Add(c3.SizePos(),"Tab 3");

        Add(b1.TopPos(5,20).LeftPos( 5,50));
        Add(b2.TopPos(5,20).LeftPos( 60,50));
        Add(b3.TopPos(5,20).LeftPos(115,50));
        b1.SetLabel("Set 1");
        b2.SetLabel("Set 2");
        b3.SetLabel("Set 3");

        b1<<=THISBACK1(SetTab,0);
        b2<<=THISBACK1(SetTab,1);
        b3<<=THISBACK1(SetTab,2);
    }
    void SetTab(int n){
        tabs.Set(n);
    }
};

GUI_APP_MAIN{
    App().Sizeable().Run();
}
```

If I didn't get it right, please try to explain you problem once more...

Best regards,
Honza
