Hello,

I have 4193-1~natty0 (upp), 4193-1~natty0 (theide-nogtk) and 4:4.5.2-1ubuntu3 (gcc) installed on Ubuntu 11.04 - the Natty Narwhal.

I cannot execute the "Hello,platform" example. The message "Invalid build method" occurs.

I have read [http://www.ultimatepp.org/forum/index.php?t=msg&goto=32246&S=42fbe2fb6109ad13eefd446d54f9e59a&srch=invalid+build+method#msg\\_32246](http://www.ultimatepp.org/forum/index.php?t=msg&goto=32246&S=42fbe2fb6109ad13eefd446d54f9e59a&srch=invalid+build+method#msg_32246) and my

GCC.bm is readable but contains 0 bytes. Here is a screenshot which may help finding the solution.

Thanks in advance!
