Hi Alboni,

It is quite simple, just call Left() (or Right(), Bottom() or Top()) on the toolbar widget. For example: MyAppWindow() {
  Title("My application with bars").Sizeable();
  AddFrame(menu);
  AddFrame(tool.Left());
  menu.Set(THISBACK(MainMenu));
  tool.Set(THISBACK(SubBar));
 }(Code taken from tutorial/Gui_11, just added the Left()).

Best regards,
Honza
