nixnixnix wrote on Sat, 22 December 2012 20:07Hi Mirek,

When I try I get the following or similar error:

----- CtrlLib (MT OCOE PRO AC CLIENT_MIT HEADLESS RAINBOW SKELETON GCC SHARED LINUX POSIX) (1 / 26)
LabelBase.cpp
Button.cpp
Switch.cpp
EditField.cpp
Text.cpp
LineEdit.cpp
DocEdit.cpp
ScrollBar.cpp
HeaderCtrl.cpp
In file included from /home/nick/upp/uppsrc/CtrlCore/CtrlCore.h:20:0,
from /home/nick/upp/uppsrc/CtrlLib/CtrlLib.h:4,
from /home/nick/upp/uppsrc/CtrlLib/LineEdit.cpp:1:
/home/nick/upp/rainbow/Skeleton/Skeleton.h:75:14: error: cannot declare field

/home/nick/upp/rainbow/Skeleton/Skeleton.h:5:7: note: because the following virtual functions

/home/nick/upp/uppsrc/Draw/Draw.h:445:15: note: virtual void Upp::Draw::DrawImageOp(int, int, int, int, const Upp::Image&, const Rect&, Upp::Color)

/home/nick/upp/rainbow/Skeleton/Skeleton.h:74:7: note: because the following virtual functions

/home/nick/upp/uppsrc/Draw/Draw.h:445:15: note: virtual void Upp::Draw::DrawImageOp(int, int, int, int, const Upp::Image&, const Rect&, Upp::Color)
ArrayCtrl.cpp

repeated many times. Are my flags wrong? I have copied code across from upp/rainbow so that I now have upp/uppsrc, upp/bazaar and upp/rainbow. Are there more packages that I need please?

Nick

Now this rather looks like you have hit a period of unstability - I am now working on new rainbow backends, adding or changing stuff here and there. Just yesterday I have found that skeleton was broken - uppweb did not compiled. Today, it should be fixed in svn again.
