Hello

In my opinion default MenuBar value of leftgap is too low. It should be around 24 not 16 pixeles as it is now. Where you can find this initialization? Go to CtrlLib, next MenuBar.cpp, at the end find the line number 46.

I have attached demonstration screenshots with leftgap value on level 16 and 24 pixels. (.zip file - 3 screenshots). Note the adhesion of white outline image when the one of menu bar possition is active.

P.S.
I have noticed the same problem on Windows XP.

Sincerely,
Klugier
