Have you checked out how UWord does this?

Open examples/UWord package, select RichEdit package and look for FontFaces(), SetupFaceList() etc.

Excerpt:

```
void RichEdit::SetupFaceList(DropList& face)
{
    face.ValueDisplay(Single<ValueDisplayFont>());
    face.SetDisplay(Single<DisplayFont>());
    face.SetLineCy(20);
}
```

Hope this helps,
Lionel
