Hello,

I'm working on the design of an algo-trading monitor, and I need a plotting library which can make financial charts(OHLC, candlestick [both static and dynamic plotting support]) and statistical charts (histogram charts ,etc).

Bazaar/Scatter is not enough.

I've tried "ChartDirect" "PLPlot" before I meet U++, and I do not know how to make a wrapper of them with Upp::Ctrl.

So here comes 2 solutions:

- 1.Enrich Scatter (now maybe ScatterCtrl & ScatterPlot library) to support more chart types
- 2.Include external plotting libraries to Upp.

I'm looking forward to your advices.Thanks.
