I get an error when compiling ANY Upp project that has a .rc file included. Using MSC10

Example compiling GoogleTranslator:

----- CtrlLib (GUI MT MSC10 DEBUG DEBUG_FULL BLITZ WIN32 MSC) (1 / 11)
----- GoogleTranslator (GUI MT MSC10 DEBUG DEBUG_FULL BLITZ WIN32 MSC) (2 / 11)
----- CtrlCore (GUI MT MSC10 DEBUG DEBUG_FULL BLITZ WIN32 MSC) (3 / 11)
----- Draw (GUI MT MSC10 DEBUG DEBUG_FULL BLITZ WIN32 MSC) (4 / 11)
----- plugin/bmp (GUI MT MSC10 DEBUG DEBUG_FULL BLITZ WIN32 MSC) (5 / 11)
----- RichText (GUI MT MSC10 DEBUG DEBUG_FULL BLITZ WIN32 MSC) (6 / 11)
----- Core (GUI MT MSC10 DEBUG DEBUG_FULL BLITZ WIN32 MSC) (7 / 11)
----- plugin/z (GUI MT MSC10 DEBUG DEBUG_FULL BLITZ WIN32 MSC) (8 / 11)
----- plugin/png (GUI MT MSC10 DEBUG DEBUG_FULL BLITZ WIN32 MSC) (9 / 11)
----- Web (GUI MT MSC10 DEBUG DEBUG_FULL BLITZ WIN32 MSC) (10 / 11)
----- GoogleTranslatorDemo (GUI MT MAIN MSC10 DEBUG DEBUG_FULL WIN32 MSC) (11 / 11)
GoogleTranslatorDemo.rc

There were errors. (0:00.28)

Compilation succeeds once I remove the .rc file.
Any clues?
Tks!
