In upp\uppsrc\Core\Socket.cpp

change

```
bool IpAddrInfo::Execute(const String& host, int port, int family)
{
    Clear();
    entry = exe;
    addrinfo *result;
    entry->addr = sGetAddrInfo(~host, ~AsString(port), family, &result) == 0 ? result : NULL;
    return entry->addr;
}
```

to

```
bool IpAddrInfo::Execute(const String& host, int port, int family)
{
    Clear();
    entry = exe;
    addrinfo *result;
    if(sGetAddrInfo(~host, ~AsString(port), family, &result) == 0 && result) {
        entry->addr = result;
        entry->status = RESOLVED;
    }
    else {
        entry->addr = NULL;
        entry->status = FAILED;
    }

    return entry->addr;
}
```
