Subject: StaticImage cannot show BMP file

I am using a StaticImage control in my project and can display JPG images using

stImg.Set("JPGFILE.JPG");

where stImg is a StaticImage control on layout

How can I display a .BMP file? I have found no example to load a BMP file from disk to staticImage. Would it be possible to use plugin/bmp for this purpose or am I shooting in the dark? Can someone please show me a simple example to load a file.bmp from disk and .Set to a StaticImage?
