Subject: [SOLVED] Control4U_demo cannot close ?

Hi,

I have an app using Control4U, I was a long time not working on it. And now, the app hangs when I open a dialog box using some controls from Control4U.

Trying to understand what happens, I just compile Controls4U_Demo, and I see that it hangs when I try to close the window...

I'm using Linux (Mint Serena) and Upp 11155-xenial-amd64. Is it a problem with this version, or what could happen ?
