Hello,

SSH package and examples are updated. This update fixes a critical bug in libssh2, which leads to heap leaks. I strongly recommend the update.

Also SFtp gained two useful methods:

- GetCurrentDir()
- GetParentDir()

Bug reports, patches, criticism, suggestions, or any questions are always welcome.

You can always find the updated package and the address of its GIT repo in the first message of this topic.

Best regards,
Oblivion
