jimlef wrote on Tue, 27 October 2020 16:15I understand... it's a minor thing as as you say I can do a `optProdTaxable.WantFocus(true)` in code...
but better to keep theide and library all at the same level I think.
Thanks again

Actually, it is not hardwired in theide; special files with `.usc` extension control this. Check `CtrlLib/CtrlLib.usc` ... So it is to keep library and library at the same level
