Quote:Actually, if U++ ever started to be used more widely, nice possible source of funding there...

Fingers crossed.

Anyway, the above patch adds the ability to set ALT + G and default search provider.

In time if Upp gains more audience, we can simply ship a selected set of default entries too (Json file compiled-in as a binary resource, maybe). For now, the hard-coded default is Google but it can be changed by users, using the web search manager or simply by editing the ide.search file.

The real benefit of this configurable search engine is that it allows users to do something like this:

Best regards,
Oblivion
