```
bool InsertDocument(ValueMap * header, vector<vm*> * rows){
```

```
    Sql query_header(my_mssql_db);  
    query_header.ClearError();
```

```
    Sql query_body(my_mssql_db);  
    query_body.ClearError();
```

```
    query_header.Begin();  
    query_body.Begin();
```

This is really quite ugly code: Transaction is associated with SqlSession, so the second begin starts the second level.

I agree it was one desperate attempt, at the end I removed the "double" session...
