Hi Mirek,

Thanks for getting this going! Unfortunately, my hardware returns false for `IsPointerPen()`. Based on RDUMPs I tried, it never even visits this code in `Ctrl::WindowProc()` :

```
case WM_POINTERDOWN:  
case WM_POINTERUPDATE:  
case WM_POINTERUP:  
...
```

I will try to dig in further to figure out what's going on...

As for Windows 7, I have none left... I hope someone around here still does.

Best regards,

Tom
