Sql/SqlStatement.cpp:

The old code:

```
SqlSelect& SqlSelect::NoWait() {  
    text << " nowait";  
    return *this;  
}
```

The fixed code:

```
SqlSelect& SqlSelect::NoWait() {  
    text << SqlCode(SQLITE3, "")(" nowait");  
    return *this;  
}
```
