
Subject: Weight of the compiled program

Hi,

I'm testing U++ and it's really interesting. However, I have a question about the weight of the binary file. I compiled the "hello world" example and the weight of the program is slightly above 5mb. In the FAQ section it is written that the program should weigh less than 1mb ([www.ultimatepp.org/www\\$upweb2\\$FAQ\\$en-us.html](http://www.ultimatepp.org/www$upweb2$FAQ$en-us.html)). Am I doing something wrong or is 5mb the initial weight of u++ itself?

Regards, KP6
