Thanks Mirek,

That was fast!

1. Now I can see it, while it's still a bit slow to find it.
2. Layout editor is much better, but at least LabelBox and StaticText could yet switch their text color.
3. Perfect!
4. For some reason, the window still opens filled white when in dark theme. Could it be because of the ArrayCtrl then?

Best regards,

Tom

EDIT: It's not the ArrayCtrl... I removed the code that attaches it to the window, but still the window opened white until it had time for paint.
