Hello,

here is my latest version.

I added a zoom dropdown list that immediately updates the zoom level of the page. There is also a method to load a TXT file, automatically wrapped in HTML u

There is also a Print button which unfortunately still does not work proper

At the moment I am struggling with QTF and TXT reports, especially when rep

I really hope that one of our U++ gurus may eventually take a look at the p

To compile it, optimization must be disabled (remove the default -O3) and

```
C:\Users\forla\Documents\MyAppsExp\LHUpplitehtml\src\gumbo\include
C:\Users\forla\Documents\MyAppsExp\LHUpplitehtml\src\gumbo\include\gumbo
C:\Users\forla\Documents\MyAppsExp\LHUpplitehtml\include
C:\Users\forla\Documents\MyAppsExp\LHUpplitehtml\include\litehtml
```

Perhaps these include paths could be configured automatically inside the p

If Klugier or anyone else believes this project is worth completing and pul

Thanks to all of you,

Luigi
