Hi,

There were C2872 errors while compiling MyUppApp with Upp 612-dev3.

I'm compiling using MSC8 Optimal build.

To "fix" it, I have made one change to:

topic_group.h at line 117:

```
#define COMPRESSED static const Upp::byte data[] = {
```

The MyUppApp project now builds without any errors and runs okay.

Best Regards,

Yeoh
