I couldn't catch the idea with PaintBackground so I've added
a little to HeaderCtrl.h and HeaderCtrl.cpp. The result is here:

then you can have something like:
array.HeaderObject().SetTabColor(1, SYellow);

or just the actual HeaderCtrl test is this:

```
#include <CtrlLib/CtrlLib.h>

void test(){
 //just to demonstrate WhenAction
}

GUI_APP_MAIN
{
// ArrayCtrl arr;
// array.HeaderObject().SetTabColor(1, SYellow);

 TopWindow w;
 HeaderCtrl hdr;

 hdr.SetRect(10,10,550,30);

 hdr.Add("blue-action",1.0,SBlue);
 hdr.Tab(0).WhenAction=callback(test);

 hdr.Add("yellow-red",1.4,SYellow);
 hdr.Tab(1).SetInk(SRed);

 hdr.Add("green",0.7,SGreen);
 hdr.Add("brown",0.5,SBrown);
 hdr.Add(AsString(hdr.GetTabColor(3)));
 hdr.Add("red",0.5,SRed);

 w.Add(hdr);
 w.Run();
}
```

how does it compare with PaintBackground?
