Subject: Cannot use *.mdb files

I have been trying to use OLEDB to open and use a mdb file. It opens the file without error. But when I try to do anything for instance EnumDatabases(), I get an error message.

The quickest way to demostrate this is to use the sqlcommander and add EnumDatabases() right after it is initialized.

it always seems to throw the exemtption at
OleVerify(srowset->GetRowset(NULL, DBSCHEMA_CATALOGS, 0, NULL, trowset.GetIID(), 0, NULL, trowset.SetUnk()));

I may just be doing something wrong also. Thanks in advance
