Windows 7 64bit.

LocalProcess2 doesnt show child app window (it is running).

Proc.IsRunning() returns true and Task Manager shows it running.

Here is my code:

```
LocalProcess2 Proc;  
Vector<String> Args;  
String      strArg1 = "1";  
String      strCmd;
```

```
Args.Add(strArg1);
```

```
strCmd = " C:\\upp9251\\out\\MyApps\\MSC15x64.Debug.Debug_Full.Gui.Mt\\ ChildApp.exe ";
```

```
Proc.Start(~strCmd, Args);
```

```
Sleep(1000);
```

```
Proc.Detach();
```
