Looks like the bionic versions don't build.
Should be an easy fix by changing the dependency on libpng12 to libpng16 in the dsc file

It compiles fine for me.

```
$ ldd /home/xxx/local/bin/ide | grep png  
libpng16.so.16 => /usr/lib/x86_64-linux-gnu/libpng16.so.16 (0x00007fb18f7e8000)
```

Yes I can compile it myself.

I am talking about the binary packages on the download page.

Hello,

I would like to inform you that Ubuntu packages is not longer supported. For more information, please read following forum thread [#msg_49369](https://www.ultimatepp.org/forums/index.php?t=msg&goto=49369).

Sincerely,
Klugier

So I went ahead and built packages for ubuntu 18.04 (bionic beaver) of the latest stable version for my own comfort. Might as well share them

theide package (bionic)

upp package
