Hi. I want put a button in the right-bottom of the window but it doesn't work. I follow the examples on the web page but it continues not to work. Here is the code

```
#include <CtrlLib/CtrlLib.h>

struct App : public TopWindow{
    bool list_numbers;
    Button botao_sair;

    void Click(){
        PromptOK("O programa vai ser encerrado!");
        Exit();
    }
    virtual void Paint(Draw& w) {
        w.DrawRect(GetSize(), SBlack);
        w.DrawText(20, 20, "Isto ainda nao esta como eu quero!!!!", Arial(22), White);
    }
    void Exit(){
        Close();
    }
    void List_Numbers(){
        list_numbers=!list_numbers;
    }
    void show(int i){
        PromptOK(AsString(i));
    }
    void draw(Bar& bar){
        for(int i=0;i<10;i++)
            bar.Add(AsString(i), THISBACK1(show,i));
    }
    void opcoes(Bar& bar){
        bar.Add("Mostrar numeros", THISBACK(List_Numbers))
            .Check(list_numbers);
        if(list_numbers==true)
            bar.Add("Lista :", THISBACK(draw));
        bar.Add("Sair", THISBACK(Exit)).Key(K_CTRL_Q);
    }
    void Menu1(Bar& bar){
        bar.Add("Opcoes",THISBACK(opcoes));
    }

    MenuBar Opcoes;

    typedef App CLASSNAME;
```

```

App(){
    list_numbers = false;
Add(botao_sair.RightPos(10, 100).BottomPos(10,20));//HERE!!!!
    botao_sair.SetLabel("Sair");
    AddFrame(Opcoes);
    Opcoes.Set(THISBACK(Menu1));
    botao_sair<=<=THISBACK(Click);
}
};

GUI_APP_MAIN
{
//App().SetRect(0,0,50,50);
    App().Title("My first GUI").Sizeable().Run();
}

```

Well i think that i don't understand how .LeftPos(), TopPos(), RightPos() and BottomPos() work. If you can explain me and see why this happen in my code i will be thankful.
Thanks all.

 I've run your code and I got a button in the right-bottom side of the window. It seems to work. Why you say it doesn't work, what do you want to achieve?

Luigi

Thanks all.

What if you try to imagine PosFromLeft, PosFromRight etc...? It helps for me...
