Subject: PDB debugger support of U++ types, GBD prettyprinter anybody?

Hi,

I have started playing with direct support of U++ types in PDB debugger. After a lot of deliberation over years, I have decided to simply hardwire all the logic in the debugger for now. However I can only do this for PDB debugger.

Meanwhile, GDB supports pretty-printing API with Python. Perhaps somebody brave could look into that and provide GDB pretty-printing code that we could ship with U++?
