Hello, if I extract the tarbal and type make it doesn't compile as usual. Below the messages.

ruben@ruben-HP-ProBook-6470b:~/Downloads/upp$ make

make: *** No rule to make target '/home/cxl/upp.src/uppsrc/ide/BaseDlg.cpp', needed by '.cache/upp.out/ide/GCC-Gcc-Gui-Linux-Main-Posix-Shared/BaseDlg.o'. Stop.

One thing I spotted immediately was this /home/cxl path which isn't on my system

Kubuntu 18.04
upp-posix-14263.tar.xz
same with 14207
14101 did still work

Fixed in upp-posix-14275.tar.xz but upp is in unstable state right now.
Mirek is working on the posix install process, on theide and on umk build and config system.

Ok, thanks, I'll stick to 14101 for now.
