Hello,

I would like to change global LabelBox style (all lable boxes in all panels) in order to be able do this:

But the code uses PaintEdge() instead of ChPaint()

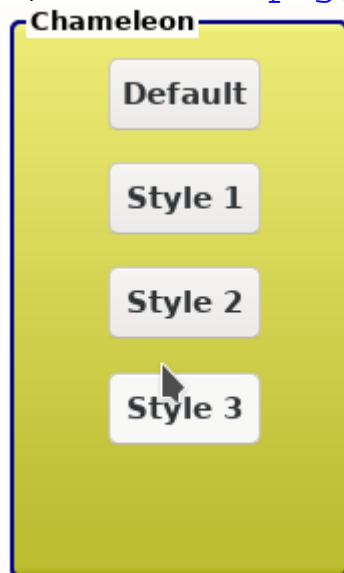

```
void PaintLabelBox(Draw& w, Size sz, Color color, int d)
{
...
    ChPaintEdge(w, r, look);
...
}
```

So I can't do it (or at least I don't know how to do it)

I can look into making a code enhancement proposition if this enhancement is acceptable

I finally found how to do it

It doesn't allow me to fine tweek the label, but it will do for now.

```
struct sChLook_LabelBox {  
    Image img;  
};
```

```
Value Make_ChLook_LabelBox(const Image& img)  
{  
    sChLook_LabelBox x;  
    x.img = MakeButton(8, img, 2, Blue());  
    return RawToValue(x);  
}
```

```
Value ChLookFn_LabelBox(Draw& w, const Rect& r, const Value& v, int op, Color ink) {
```

```
    if( v.Is<sChLook_LabelBox>() )  
    {  
        const sChLook_LabelBox& e = v.To<sChLook_LabelBox>();  
        ChPaint(w, r, e.img);  
        return 1;  
    }  
    return Null;  
}
```

```
INITBLOCK {  
    ChLookFn(ChLookFn_LabelBox);  
}
```

And at application init:

```
static const Value myLabelBoxLook =  
Make_ChLook_LabelBox(GraphCtrl_DemoImg::CTRL_BACKGND());  
LabelBox::SetLook( myLabelBoxLook );
```
