Subject: ArrayCtrl drop on all control area

Now when drop on an ArrayCtrl, the drop is allowed on existing rows, or in the top ArrayCtrl line.
Is there any way for the ArrayCtrl to allow drop on all control area, even if it is empty?

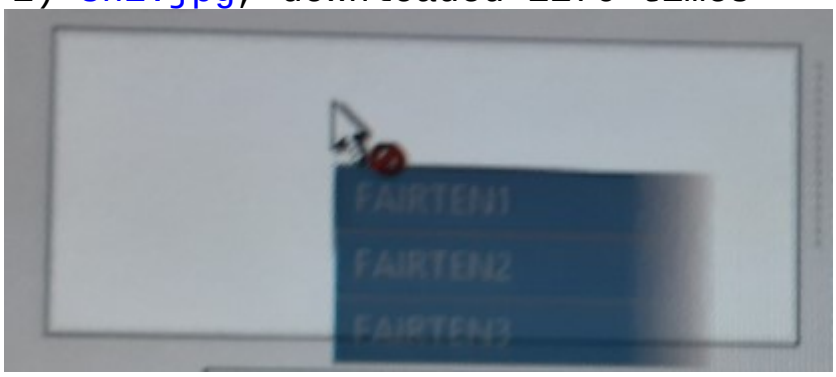

- Drop not allowed on Ctrl area

- Drop allowed in topmost line

- ArrayCtrl updated

Yes, use WhenDrop.

reference/ArrayCtrl actually demonstrates that.

It is however better with

```
for(int i = 0; i < 15; i++) {
 a.Add(i);
 b.Add(FormatIntRoman(i, true));
}
```

to create some empty space. Then you can drop normal text on the left ArrayCtrl...

Yes, the trick has been precisely not using WhenDrop, just WhenDrag and WhenDropInsert.
Now it works perfectly, as expected, thank you.
