So I have upgraded my linux server-workstation where among other things nightly builds are done. The upgrade is nicely visible on Download page:

https://www.ultimatepp.org/www$uppweb$download$en-us.html

(Nightly build starts at 1:00, used to end at 1:25, now ends at 1:07)

For the money, that CPU is real monster, fits perfectly C++/U++ development requirements.
