Hello,

As far as I remember you need to set NoRoundSize() on the list to make it working as you except. I changed this behavior for FileSel in the past. You can refer to my #60 PR for more information.

Mirek, you could consider making NoRoundSize() the default option for all list control. RoundSize() might be confused for some people and in most cases it doesn't look good. For example when you put list into resizable control.
