Any idea?

/home/jc/upp/uppsrc/CtrlLib/TabCtrl.h:58: error: declaration of ‘TabCtrl::Item& TabCtrl::I
tem::Image(const Image&)’
/home/jc/upp/uppsrc/Draw/Image.h:97: error: changes meaning of ‘Image’ from ‘class
Image’

Try

Image(const class Image&)

Alternatively, delete the line. It is deprecated exactly because naming a method this way is tricky...

P.S.: Thank you for testing Linux version. Linux maintainer is what we are missing for years...

I still can't figure out why it could not compile.

Anyhow by commenting it out, ide (607-dev2) could be compiled successfully on Ubuntu(Edgy) though some more changes of your codes have to be made as well.
1)/Draw/DrawX11.cpp
    UpdateSColors() have to be commented out
2)add the following lines to CtrlLib/LabelBase.cpp

#define IMAGECLASS CtrlsImg
#define IMAGEFILE <CtrlLib/Ctrls.iml>

#include <Draw/iml_source.h>

Regards,

3togo
