Hello everyone:

The IDE is unexpectedly changing the keyboard layout. I start working with the editor and the Spanish keyboard layout, and after a while, usually after switching screens while debugging, it switches to the American keyboard layout. This started happening after the last update.

I'm using a Linux system (Manjaro, based on Arch Linux) and KDE Plasma.

How can I change the keyboard layout?

Thank you very much

Hello I have the exact same problem for quite a long time on linux (at least two years)
I was never able to catch what the origin is : which key sequence ??

I also have strange copy/cut behaviour : I have to do at least 2 copy (CTRL+C) for the copy or CUT to work.
Otherwise the paste will contain the previously copied data

It is a known issue.

Starts from around here:

https://www.ultimatepp.org/forums/index.php?t=msg&th=114 62&goto=56914&#msg_56914

p.s: Wrong link fixed.
Best regards,
