How many file attachments per post would you like to have?
P.S.
And remember that I would need change that for each forum separately...

Well, 5 is optimal IMO. I need it mostly to avoid joining images into one big image (like in datetimectrl post). 5 is ok? or you this is too many?

All (I think) U++/C++ Programming Existing Classes category made 5.
and some others: e.g CalendarCtrl...
If you want somewhere else (or more) , please ask...

Other users opinions and wishes?

I'm not another user but I have one wish. In one of polish forum I found useful option - Show all messages since last login. Very very nice option - I think it is better that current tomorrow, yesterday (which should not be removed ofcourse)

Please post a separate request...
If seriously, I haven't seen that for FUDforum (its policy to be very fast) but I will try to investigate (no promise because might go on holiday ...).
