Is the FileSel dialog Chameleonized already?  If so, how do i enable this on code?

Thanks,

Laurice

Use FileSelector instead.

BTW, funny, if you closely investigate these pictures, U++ is able to use this particular theme better than XP (see appearance of droplists)

To Laurice: Skinning does not affect whole dialogs, just appearance of widgets. We need FileSel to have something available on all platforms.

zsolt wrote on Mon, 18 December 2006 06:40Use FileSelector instead.
FileSelector use old style(98),the underlying API should be new (2000/xp)

It uses XP theme if you add a .manifest file to your project.
And additionally, you have to add a .rc file with content, something like:
1 24 "MyProject.manifest"
5555 ICON "MyProject.ico"

The MyProject.manifest is something like this:

```
<assembly
  xmlns="urn:schemas-microsoft-com:asm.v1"
  manifestVersion="1.0">
<assemblyIdentity
   processorArchitecture="x86"
   version="5.1.0.0"
   type="win32"
   name="MyProject.exe"/>
   <description>MyProject description</description>
   <dependency>
   <dependentAssembly>
   <assemblyIdentity
       type="win32"
       name="Microsoft.Windows.Common-Controls"
       version="6.0.0.0"
       publicKeyToken="6595b64144ccf1df"
       language="*"
       processorArchitecture="x86"/>
   </dependentAssembly>
```

```
    </dependency>
</assembly>
```

5555 ICON "MyProject.ico"

The MyProject.manifest is something like this:

```
<assembly
  xmlns="urn:schemas-microsoft-com:asm.v1"
```

How user friendly

I guess I will rather change the look of dialog to be more platform -like in the next iteration.
