Is there a plugin in ultimate++ to use odbc directly ?

I have an (old) sybase database that can be reached through odbc.

My database explorer use odbc directly - maybe it's a good time to convert some code of it to a plugin..

Yes.

There is also still that PostgreSQL issue...

Not this one.. (in current form it'd be useless for you as it is very inegrated with main app) - but I think I will make a plugin soon.
