Hello,

is there a way, without to change the library, to set in the UWord package the unit to "cm" and Reveal codes to transparent?

Luigi

is there a way, without to change the library, to set in the UWord package the unit to "cm" and Reveal codes to transparent?

Luigi

Good point. I had to change the library:

RichEdit.h 606:

```
RichEdit& ShowCodes(Color c)           { showcodes = c; Refresh(); return *this; }
RichEdit& Unit(int u)                   { unit = u; Refresh(); return *this; }
RichEdit& SpellCheck(bool b)           { spellcheck = b; Refresh(); return *this; }
RichEdit& SetZoom(int z)                { zoom = z; Refresh(); return *this; }
```

Good point. I had to change the library:

RichEdit.h 606:

```
RichEdit& ShowCodes(Color c)           { showcodes = c; Refresh(); return *this; }
RichEdit& Unit(int u)                 { unit = u; Refresh(); return *this; }
RichEdit& SpellCheck(bool b)         { spellcheck = b; Refresh(); return *this; }
RichEdit& SetZoom(int z)              { zoom = z; Refresh(); return *this; }
```

Thanks a lot,  
that unwanted color was very annoying  
Luigi

```
RichEdit& ShowCodes(Color c)           { showcodes = c; Refresh(); return *this; }
RichEdit& Unit(int u)                 { unit = u; Refresh(); return *this; }
RichEdit& SpellCheck(bool b)         { spellcheck = b; Refresh(); return *this; }
RichEdit& SetZoom(int z)              { zoom = z; Refresh(); return *this; }
```

...  
Which is the code for ShowCodes() to obtain "transparent"?  
So far I used White to remove the color, but now with dark background the codes appear again
