```
GUI_APP_MAIN
{
    MyApp app;
    switch(app.Run()) {
    case IDOK:
        PromptOK(String().Cat() << "OK: " << ~app.date);
        break;
    case IDCANCEL:
        Exclamation("Canceled");
    }
}

~app.date
```

Why ~ I would like to understand

I want to convert a program of wxwidget U ++

To familiarize me with this new technology I think that U ++ takes care of the base and should facilitate the display

Profession

Do I make a mistake???

french

pourquoi ~ je voudrais comprendre

je veux convertir un programme de wxwidget en U++

Pour me familiariser avec cette nouvelle technologie je pense que U++ prend en charge le

est-ce que je me trompe ???

~app.date

is the short form of

app.date.GetData()

which returns the value of widget (if any).

Really simple OK thank you

I work with U++ 711 and I have to compile one with U++ or codebloock and MING 4.2.1 dw2
nobody brilliant difference for my applications win32 api

Now I pass in the transformation of an application of management of project (which produces pdf
for the service quality " followed computer modifications AS400 ")

Certainly that I would return towards you to help me

Ps (there are many of solutions if we search the questions)

Thank you

french
vraiment simple ok merci

je travaille avec U++711 et j'ai compiler soi avec U++ ou codebloock et MING 4.2.1 dw2 aucune

certainement que je reviendrais vers vous pour m'aider

ps(il y a beaucoup de solutions si on fouille dans les questions)

merci
