Can anyone provide me an example how to use WithDropChoice?

Lets say i have this:

```
Add(lblCustomerName.SetText("Name:").SetAlign(ALIGN_RIGHT).RightPos(270,
150).TopPos(top, 20));
Add(fldCustomerName.RightPos(10, 250).TopPos(top, 20));
fldCustomerName.SetText(customerName);
```

How can i add a DropChoise-List to fldCustomerName which is an EditField-widget?

Michael

You need to declare it as WithDropChoice<EditField> fldCustomerName (or whatever ctrl you want).

You can do this in the designer by changing the control type (left of ctrl name).

James.

Oh, this is really easy to handle.

```
WithDropChoice<EditField> fldProduct;
```

```
Add(lblProduct.SetText("Produkt:").SetAlign(ALIGN_RIGHT).RightPos(270, 150).TopPos(top,
20));
Add(fldProduct.RightPos(10, 250).TopPos(top, 20));
fldProduct.SetText(product);
fldProduct.ClearList();
fldProduct.AddList("product1");
fldProduct.AddList("product2");
fldProduct.AddList("product3");
```

Sometimes it would be easier if there would be an example in every manual-entry.

Thanks

Michael
