Installed 602 Beta 3. The example CompDir no longer compiles. Main.cpp line 71 gives error c2146.

Sorry cannot be of more assistance until I know the system better.

QtfCtrl seems to be an issue.

You can compile the example by modifying main.cpp

line 71:
 RichTextCtrl qtf;

line 262:
  qtf = comptext;

Not sure if RichTextCtrl is the right Ctrl to use (RichTextView is an other option) but at least it works.
