Hello,

using RichEdit with language set to De-de i get many clipping-errors. As an example i attached two screenshots to illustrate the problems (same problems can also be found in other layouts from RichEdit).

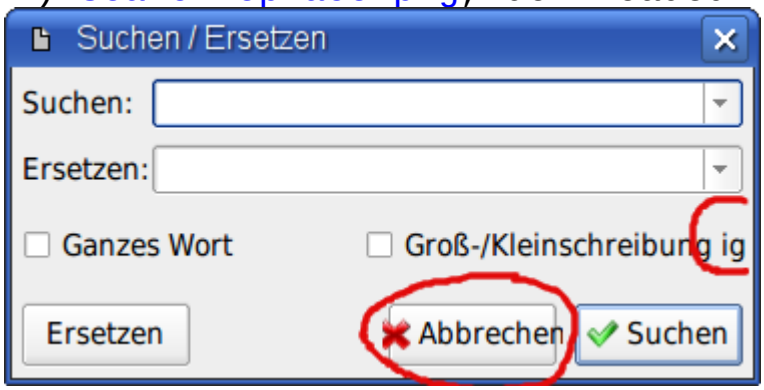

Greetings,
Matthias

Most are fixed, but I have nasty problem with "Abbrechen"... It simply does not fit with that GTK icon together into the button (unfortunately, not only that one, but all "cancel" buttons everywhere...).

I see two solution. Either make all cancel button wider or remove the icon if text does not fit. Second one is automatic... so perhaps safer. What do you think?

Mirek

OK, for now, fixed by autatically removing the icon. Does not look bad.
