
Subject: Small fix for valgrind

Hi,

I have tested my program with valgrind and found a little problem in U++ while testing:

Conditional jump or move depends on uninitialised value(s)

==9751== at 0x57F549: Upp::Ctrl::UpdateArea0(Upp::Draw&, Upp::Rect_<int> const&, int)
(CtrlDraw.cpp:480)

This can be fixed if you add an initialization for hasdhctrl=false in the Ctrl constructor. (File CtrlCore/Ctrl.cpp Line~600)
