I don't know why this was changed from

```
pIPL("\a .,-/")
```

to

```
pIPL("\r .,-/")
```

but with the new filter I cannot type . and , as date field separator.

What \r and \a means?

I did a cleanup a couple of weeks ago. Sorry for any inconvenience (and bugs...).

I guess it should be "\r ,=/" (all gets converted to '.').
